

MyStar in facts

The construction of the most technologically advanced and energy efficient LNG vessel in Tallink's fleet, MyStar started on **6 April 2020** at the Rauma Marine Constructions Shipyard in Rauma, Finland.

MyStar is 212.4 metres long and has capacity to carry 2800 passengers. The ship's five 8-cylinder dual-fuel main engines are capable of running on natural gas and marine diesel fuel. The ship is using diesel-electric propulsion combined with fixed pitch propellers giving the best efficiency. MyStar comes equipped with Shore-to-Ship Power Solution and Smart Car Deck solution. The vessel has design speed of up to 27 knots and will join company's vessels Megastar and Star on the company's Tallinn-Helsinki shuttle service route.
